

**Quick
& easy
installation**

Assemble in less than 30 seconds.

The Easy-Installation series.

Goobay's Easy-Installation series offers a choice of two connectors: F connector and IEC/coax plug/socket. F connectors are mostly used in satellite technology and are equipped with a screw lock. IEC/coax plugs/sockets are frequently used in cable television, DVB-T and broadcasting.

The connectors enable fast and simple assembly of coaxial satellite and antenna cables. Especially when the cable length is not known beforehand, connectors from the Easy-Installation series offer flexible solutions to precisely assemble coaxial cables.

And this is how it works: In just three steps, you achieve a professional result and interference-free reception without any loose contacts or damaged shielding. Measuring, cutting and assembling in less than 30 seconds – that's how innovative and effortless cabling works!

IEC/coax plug/socket

F connector

Goobay

Easy-Installation IEC/Coaxial male

for cable diameters of 6.5-8.0 mm

- innovative, effortless assembly of satellite and coaxial cables
- achieve a professional result in just 3 steps
- Do it quickly: Measure, cut and assemble cables in under 30 seconds!
