

Secure pole position. Galaxy S20 ready for launch.

With the Galaxy S20, Samsung is bringing three top smartphones to market. 3sixT naturally has the right accessories for the various models of the new Samsung flagship:

- **PureFlex** | The protective case offers protection for every day after a few seconds of attachment thanks to the soft TPU edges and a transparent polycarbonate back. Despite its slim, lightweight design, it protects against external damage while providing easy access to buttons and ports.
- **PrismGlass** | Easy to apply and hard to damage. There's no better way to describe the scratch-resistant and dirt-resistant display glass with Corning® Gorilla® technology.

3sixT Black
